## ELECTION JUDGES FOR THE VACANCIES

Ten election judges were named last night by the city commissioners to fill vacancies where resignations had been filed. The districts not changing were the Second, Eighth, Ninth, Tenth, Eleventh, Thirteenth and Sixteenth.

Those chosen for the positions were as follows:

First, Mrs. Little Light in place of J. M. Carlson; Third, William Parry in place of Mrs. Lippincott; Fourth, J. W. Browning in place of George Wilson; Fifth, E. S. King in place of M. B. Richardson; Sixth, Sadie West in place of Mrs. Lee Anderson; Seventh, S. J. Van Ness in place of Georgina Marriott; Twelfth, Mrs. Kate Mole in place of J. A. McCulloch; Fourteenth, Edith Reed in place of Tom Reid; Fifteenth, Joseph G. Larson in place of Carl B. Wallin; Seventeenth, J. E. Ballantyne in place of Mrs. Claude Robinson.

## SAW CHILD THROWN INTO FLAMES

EAST ST. LOUIS, Ill., Oct. 22.—Testimony that during the race riots here on the night of July 2, a mob threw a negro child into a burning house was given at the congressional inquiry into the riots today by Edwin

Popkess, a reporter for a St. Louis newspaper.

He said he also saw four or five national guardsmen shoot and kill two negroes who ran from a burning house. Inquiry into political conditions in East St. Louis was continued today by the congressional committee.

Paul Y. Anderson, a newspaper reporter, said that before Federal Judge Landis ordered a reformation last November many saloons in the city were conducted in a disorderly manner and were the chief breeding places of the crime.

The lawless element that frequented these saloons, he thought was the same element that took part in the race riots.

The crime-breeding saloons, he said, were the chief factor that made the riots possible.

John W. Paton, general manager of Morris & Company, said he was present at the meeting of the East St. Louis chamber of commerce on the afternoon of July 2 after the mob had begun its work. At that time, he said, the general impression was that the rioting was being caused by striking employees of the Aluminum Ore Reduction company. He said the mayor told the chamber of commerce meeting that "police work had got beyond his control."

Congressman Baker here interrupted and said:

"You are a big strong man, physically and mentally. Why didn't you go out and get fifty rifles and stand between that mob and the men and women they were murdering?"

"That is just what we thought," said Paton, "but we thought the mayor and the police ought to take care of the situation. To tell the truth, we were afraid for our lives."

## BYRON PACE IS IN A SERIOUS CONDITION FROM INJURY

Byron Pace, the Ogden man who was injured October 13 on the O. L. & I. system north of Ogden, and is now at the Dee hospital, is reported as in a critical condition. It was reported at first that the man's name was Case, which was an error. Mr. Pace was a clerk for the J. S. Carver & Sons Grocery company prior to working for the railroad and is very well known to many Ogden people.

He was injured while attempting to couple two cars in the dark. The coupling pins smashed together when his body was between them, a hole being virtually driven through his side. His left leg has been attacked by gangrene. Although conscious, Mr. Pace is said to be very low.

## SALTS IS FINE FOR KIDNEYS, QUIT MEAT

Flush the Kidneys at once when Back hurts or Bladder Bothers.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Jad Salts is inexpensive and cannot injure. Makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.—Advertisement.

## BODY OF LITTLE GIRL FOUND IN A SLOUGH

BLACKFOOT, Idaho, Oct. 22.—The body of 3-year-old Dorothy Norton, daughter of Thomas W. Norton, who disappeared from her home at 8:30 o'clock this morning, was found late this afternoon in a slough of Snake river a mile northwest of Blackfoot. The discovery of the body was made by A. Smith, J. T. Carruth and L. B. Kimble, members of a searching party. The child had fallen into a canal which runs in front of the Norton home and had been carried to the slough. Nearly 100 persons were engaged in the search.

The father of the unfortunate little girl is the foreman of the Blackfoot factory of the Utah-Idaho Sugar company.

## UTAH THEATER OPENS THURSDAY AS A NEW HOUSE

When Ogden people enter the Utah theater on Washington avenue, Thursday afternoon, they will realize that the city has another show house which is a distinctive attraction. The new house will be opened on that date by Manager A. J. Fyhn and a warm welcome will be extended to everyone.

The Utah theater has undergone complete repairs and renovations during the past few weeks and has been turned into one of the most attractive and comfortable moving picture theaters in the city. New systems of heating, ventilation and lighting make the show house up to the last word in modernness and the seating arrangements will prove a distinct fascination for people to comfortably sit and view a screen show without craning their necks.

**Pipe Organ.**

The interior decorating and the installation of an immense pipe organ are also features which will add to the beauty and attractiveness of the theater. The new organ will produce 678 pipe combinations and is said to be a work of masterly skill as a musical instrument. In addition to the pipe organ an electric orchestra which is way above the average mechanical orchestra will be installed so that a variety of music may be offered.

One thing which the management of the Utah theater is proud of is the fact that all of the material, all of the workmanship and all of the spirit which entered into the making of the new theater are Ogden. Except the few pieces which had to be shipped into the city from factories in the east, the furniture, electrical fixtures, workmanship, musical furnishings and decorating were furnished by Ogden firms and Ogden people. The C. H. Say company installed the heating system, the Ogden Electric Supply company furnished the lighting effects and fixtures, the Ogden Furniture company furnished carpets and the Boyle Furniture company the draperies. Armas Larson has been working over a month on the interior decorations and they have aroused much favorable comment.

**Unique Heating System.**

The heating system is unique and efficient. It is automatically regulated so that an even temperature will be maintained at all times. A valve will close if the room is too warm and will open if the room is too cold. There are two sewer connections in the lower end of the house so that the floor, which has a considerable slant, may be washed regularly and sanitariously. The venting system is an especial improvement. Forced draught fans push clean, pure air into the building, and forced suction fans draw used air out of the room near the ceiling. This system will furnish a continuous supply of clean air to the house at all times.

**Big Drop in Floor.**

The floor is one of the improvements which will make this house distinctive. It has a drop from back to front which will permit theater patrons to view the film in perfect comfort. The floor has been lowered six feet near the front. The screen is also raised to a height sufficient to allow a perfect view from all parts of the house. From the screen to the first row of seats the distance is so great that anyone occupying these seats will view the picture in comfort. The room has also been lengthened thirty-five feet.

The seating capacity of the new house will accommodate 600 patrons. The seats are new and cushioned and there is plenty of "leg room" between the rows.

**Lights Indirect.**

The lighting system has been worked out on the semi-direct plan and will furnish sufficient light in the house to show every face in the audience but will not hinder a perfect view of the film.

In the interior of the house are six artistic windows which were made by the Ogden Art Glass & Mirror company at considerable expense.

Manager Fyhn has secured some of the best moving picture films in the United States for the attention of his patrons. In the opening matinee of Thursday Harold Lockwood will appear in "Paradise Garden," a film extensively praised. Clara Kimball Young will appear next in "Magda," one of her excellent portrayals. Following these films are a number of others of like merit.

## JAP LINER LOST WITH ALL ABOARD

TOKIO, Oct. 22.—The Japanese steamship Hitachi Maru, due at Delagoa bay, Portuguese East Africa October 1, is missing and is believed to have struck a mine with the loss of all on board. The number of passengers is not known, but Mr. Onai, London manager of the London Nippon Yusen Kaisha, owners of the vessel, was among them.

The Hitachi Maru, a vessel of 6556 tons gross, sailed from Yokohama for Liverpool on August 29. She touched at Colombo, Ceylon, on September 24, but since then nothing has been heard from her.

## IDAHO RANCHMEN KILLED IN A DUEL

IDAHO FALLS, Idaho, Oct. 22.—Ed Bogus, foreman of the Clark & Deane Cattle company at Dubois, and Ed Drowns, a herder for the company, are both dead as the result of a duel fought at the ranch on Sunday. The company had been missing sheep and Bogus had accused Drowns of stealing them. Drowns sent word to Bogus that he would shoot him on sight. At noon Sunday Bogus left Dubois for the ranch in an auto. Drowns saw him coming and rode toward him, shooting as he went. Bogus

was shot through the lungs and chest as he was climbing through a wire fence. While on the ground he turned over and drawing his revolver shot Drowns from his horse, killing him instantly.

Bogus was brought to Idaho Falls and placed in a hospital, but died today. Bogus had a good reputation and had been with the company several years, while Drowns is said to have been quarrelsome, having had trouble with the men several times. Bogus was a single man and is said to have relatives in Boise. Drowns was married.

## TELLS DYSPEPTICS WHAT TO EAT

Avoid Indigestion, Sour Acid Stomach, Heartburn, Gas On Stomach, Etc.

Indigestion and practically all forms of stomach trouble, say medical authorities, are due nine times out of ten to an excess of hydrochloric acid in the stomach. Chronic "acid stomach" is exceedingly dangerous and sufferers should do either one of two things.

Either they can go on a limited and often disagreeable diet, avoiding foods that disagree with them, that irritate the stomach and lead to excess acid secretion or they can eat as they please in reason and make it a practice to counteract the effect of the harmful acid and prevent the formation of gas, sourness or premature fermentation by the use of a little Bismarck Magnesia at their meals.

There is probably no better, safer or more reliable stomach antacid than Bismarck Magnesia and it is widely used for this purpose. It has no direct action on the stomach and is not a digestant. But a teaspoonful of the powder or a couple of five grain tablets taken in a little water with the food will neutralize the excess acidity which may be present and prevent its further formation. This removes the whole cause of the trouble and the meal digests naturally and healthfully without need of peppin pills or artificial digestants.

Get a few ounces of Bismarck Magnesia from any reliable druggist. Ask for either powder or tablets. It never comes as a liquid, milk or citrate and the bisulphated form is not a laxative. Try this plan and eat what you want at your next meal and see if this isn't the best advice you ever had on "what to eat."—Advertisement.

## GERMANS STRIKE AT WEAK POINTS

WASHINGTON, Oct. 22.—Military experts here do not expect winter to halt the great allied drive against the Germans in Flanders. Secretary Baker's weekly review of war operations, issued tonight, discloses the belief of the war department that potency of material and men will enable the British and French commanders to triumph over natural obstacles and continue forcing the enemy backward without wavering for a spring.

The review touches for the first time upon the American expeditionary forces in France, declaring the men, after three months of intensive training, are in efficient fighting trim and splendid physical condition.

**Drive Called Bluff.**

In dwelling upon the importance of the battle of Flanders and its effect upon the morale of the Germans the war secretary declares it apparent that the German high command planned the recent expedition against the Russians in the Riga sector in order to bolster up morale and meet impending internal difficulties. By extending her lines in the east, he adds, Germany has merely added to the length of her line of communications and increased confidence in the final allies' victory.

The review covering the week ended October 20, follows:

"Our men in France, after three months' intensive training, are in a splendid physical condition and efficient fighting trim. They have readi-

ly become acclimatized and now feel at home in the war zone.

"Our troops have met with the most warm-hearted and enthusiastic reception on the part of the armies and people of France.

"The health of our men overseas is reported as excellent.

"The week just closed has been one of relative quiet on all fronts.

"Bad weather already prevails along the western front, wintry conditions will soon set in and the terrain will become increasingly difficult for attacking troops. Nevertheless the potency of allied material and men, the accumulation of the technical means of combat and the preparations which have been going on for many months will make it possible for the British and French commanders to triumph over natural obstacles and, with few short intervals, we may expect the offensive to press forward.

"It is not anticipated that the allies will go into winter quarters this year.

"The full importance of the battle in Flanders is beginning to be revealed. In order to appreciate the real significance of this engagement and the effect it has had on the morale of the German army and the German people, we must consider briefly the German attacks in the Riga sector, including the capture of Oesel, Dagoo and other minor islands of the Finnish gulf.

"While no attempt should be made to belittle the importance of the positions gained by the enemy, we cannot fail to record that it is apparent that the Germans undertook this expedition with a view to bolstering up the morale of the country, more particularly in order to be able to meet the impending difficulties which threaten to culminate in a renewed cabinet crisis in the near future.

**Germans Pick Soft Spots.**

"The German higher command has invariably picked out a weakened objective in order to be able to record a success, which should be of a political rather than military value. "If the enemy had any confidence in being able to stem successfully the tide of the allied advance in the west, he would throw every ounce of his strength in the balance in Flanders, and, if possible, by crushing the allied armies, bring about peace with victory," which the German has often stated as his objective.

"Germany, by extending her lines in

the east has merely added to the length of her line of communications. Thus the events in Russia today should cause us to have increased confidence in final allied victory.

**Austrian Drive Unlikely.**

"Along the western front, trench raids, as well as the usual artillery duels, are reported. Isolated counterattacks were conducted by the enemy in such a manner as to indicate that no real success was expected, but merely serve to keep up the aggressive spirit of the troops.

"It is evidence that the terrible punishment by allied artillery fire is beginning to have a very decided effect along the western front. Never before in any series of engagements have so many German divisions, after brief encounters, been withdrawn and replaced by fresh troops. Deserters from German ranks taken into the allied lines have become increasingly numerous.

"Rumors of an impending Austrian offensive directed against Italy have been current during the past week. Reports of concentrations of Austrian and German divisions to take part in this attack are noted. Any one familiar with the situation can at once determine that these rumors are exaggerated. Even should the season permit it, the concentration of the number of fresh enemy divisions, estimated as high as forty, could not, as a physical possibility, take place in the narrow Trentino valley, fed by a single railroad system.

"However, it is possible that the central powers, fearing further Italian successes along the Isonzo front, have massed a considerable number of troops in an effort to check the Italian advance and, if possible, regain some of the terrain lost during recent engagements.

"An interesting summary of troop movements in the United States shows that since the present mobilization began 314,195 persons have been transported by the railroads for the war department, of whom 256,815 were transported in standard or tourist sleepers, the remainder in ordinary day coaches. This vast movement has been conducted by the railroads without a single serious accident and the co-operation between the railroads and the department has been most cordial and effective."

# MAZOLA

The Food Administration does not ask you to stop frying foods—only to use vegetable oils in the place of butter, lard, suet, etc.

If the housewife had been asked to reduce the use of these products a few years ago we would have been forced to give up many of the delicious sautéed and fried dishes for which America is famous.

Today high prices of animal fats and the necessity for conservation do not worry the housewife—because she knows that she has Mazola, the pure oil from American corn, to depend on—in deep frying, sautéing and shortening.

In Mazola she has found the ideal cooking medium—it reaches cooking heat long before it smokes.

Mazola can be used over and over again as it does not transmit taste or odor from one food to another, even in the case of fish or onions—a great force for economy.

Also it makes exceptionally delicious salad dressings—there is no need to fear the rising prices or uncertain supply of olive oil.

Mazola is sold in pint, quart, half-gallon and gallon tins (the larger sizes are most economical). Get a can from your grocer and ask him for a copy of the Mazola Book of Recipes—or write us direct; it is free upon request.
